

KEYSTONE SUPPORT MODULE

THE SAFEST SUPPORT MODULE FOR
YOUR AIR & WATER REQUIREMENTS

The **Keystone Support Module** is engineered to simplify complex tasks to reduce the risk of accidents and improve overall workflow efficiency.

TIE-DOWN LOCATIONS FOR HOSE CONNECTIONS

Secure tie-down lugs for safety tie-offs are available at each hose connection to assist in hose retention.

CHECK VALVE FOR COMPRESSOR ISOLATION

Integrated check valves for compressor isolation can be installed at the manifold to prevent backflow.

PRESSURE RELIEF VALVES

Valves are installed on each pressure vessel to automatically release excess pressure.

KEY FEATURES AND BENEFITS

Manifold

- Connect up to 7 compressors
- Whip check tie-offs at each inlet
- 600 PSI safety relief valve
- Water drain
- Regulated supply for smaller air tools
- Three-color light tower for air pressure status
- Pressure gauge
- ASME-certified pressure vessel
- National Board registered

MANIFOLD PRESSURE STATUS INDICATOR

Visual indicator for manifold pressure status allows operators to quickly and accurately monitor pressure levels from a safe distance.

KEY FEATURES AND BENEFITS

Lubricator

- 35-gallon tank
- Lower fill height
- Easy to read sight gauge
- 2"-6" hook-up
- 600 PSI safety relief valve
- Venturi style, no moving parts
- ASME-certified pressure vessel
- National Board registered

ADJUSTABLE LUBRICATOR FOR TOOLS

Adjustable lubrication system provides precise lubrication to tools, reducing wear and tear.

ADJUSTABLE WATER INJECTION DUST CONTROL

Adjustable water injection system effectively suppresses dust in work areas, reducing respiratory hazards.

OPTIONAL REMOTE OPERATED DISCHARGE VALVE

Remote-operated discharge valve includes pilot-operated water injection valves, for full control of the system output via the wearable remote.

KEY FEATURES AND BENEFITS

Water Injection System

- Silica dust control
- Localized controls for efficiency and safety
- Reliable Honda 8.4HP engine
- Electric start
- Water injection pump variable flow up to 20.8gpm @ 1000 PSI
- 500 PDI safety relief valve

LOCALIZED CONTROL STATION

Centralized control station allows operators to make adjustments from a single location for enhanced safety

KEY FEATURES AND BENEFITS

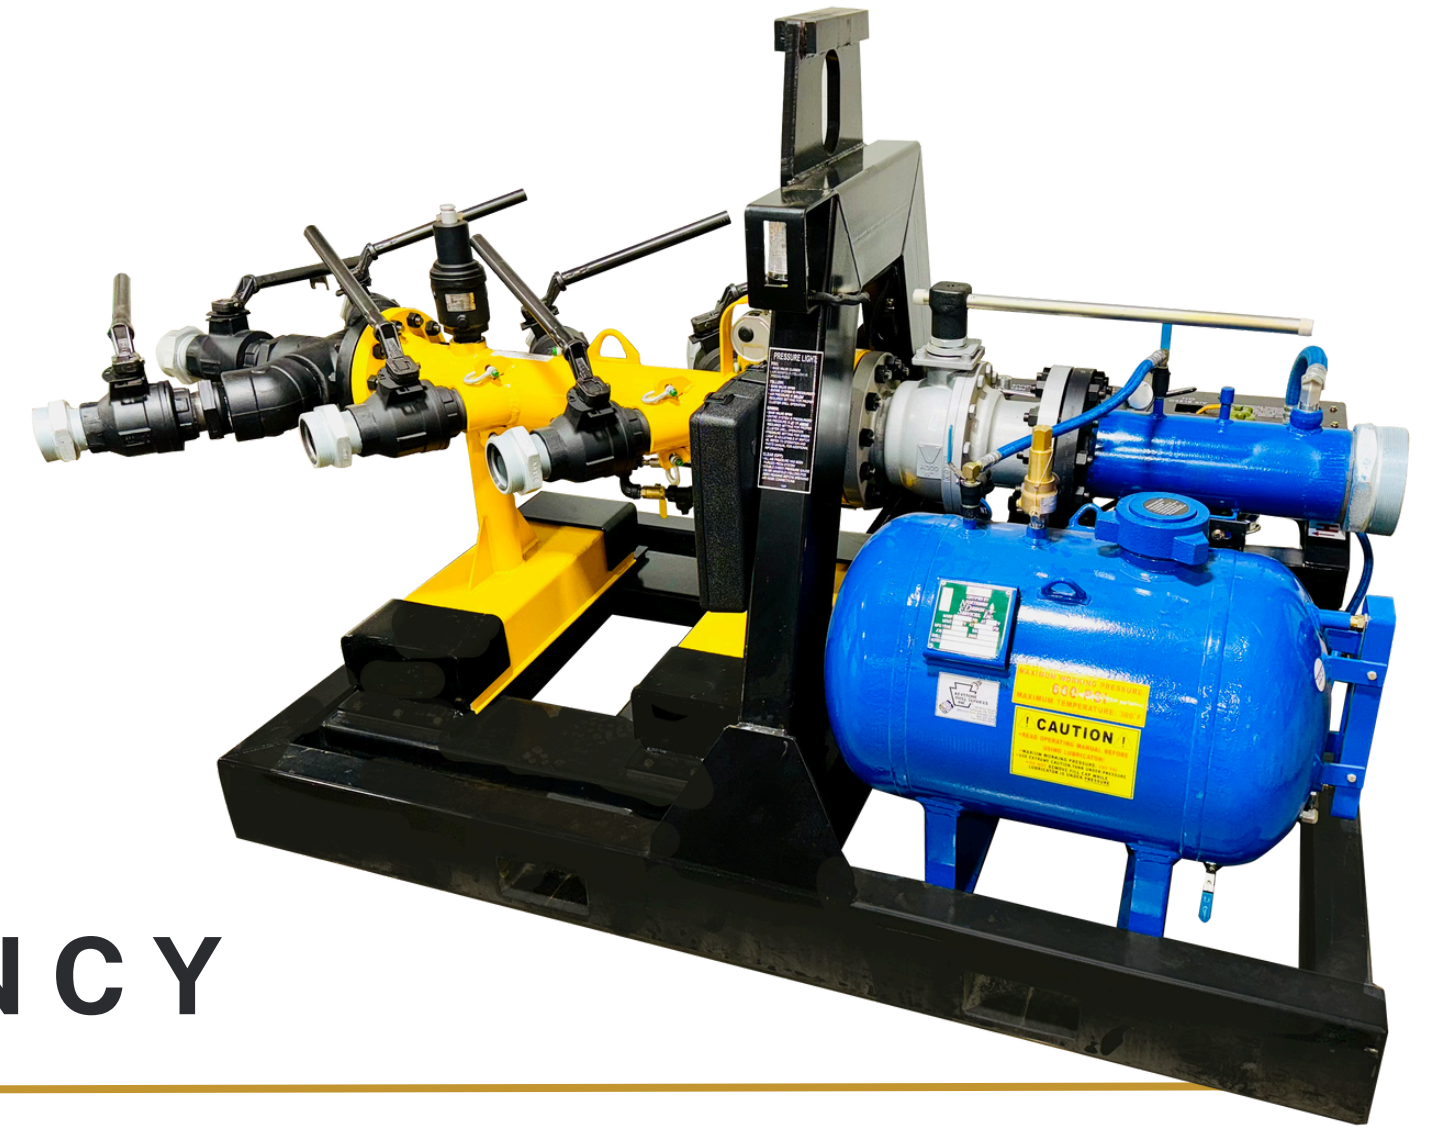

Heavy Duty Frame

- Single point lifting eye
- Fork lift pockets

The **Keystone Support Module**
represents a significant advancement
in industrial safety and efficiency.

IMPROVE SAFETY & EFFICIENCY
